1. A method for providing an information portal in a contract manufacturing framework comprising the steps of:
 - (a) providing a database including a plurality of service provider data structures, wherein each service provider data structure includes a description of a particular service provider, and wherein the database further includes a plurality of links to information;
 - (b) identifying a particular service provider data structure based on request data from a user;
 - (c) identifying a particular link based on the request data;
 - (d) sending the user the identified service provider data structure and the identified link; and
 - (e) allowing the user to obtain additional information utilizing the identified link.
2. A method as recited in claim 1, wherein the service provider data structures include data concerning contract service providers.
3. A method as recited in claim 2, wherein the service provider data structures further include data concerning legal services.
4. A method as recited in claim 1, wherein the identified link is capable of being utilized to obtain information concerning patent licensing.
5. A method as recited in claim 1, wherein the identified link is capable of being utilized to obtain information concerning multi-country licensing.
6. A method as recited in claim 1, wherein the database is accessed utilizing a network.

- 1 7. A method as recited in claim 1, wherein the network is the Internet.
- 1 8. A computer program embodied on a computer readable medium for
2 providing an information portal in a contract manufacturing framework
3 comprising:
4 (a) a code segment for providing a database including a plurality of service
5 provider data structures, wherein each service provider data structure
6 includes a description of a particular service provider, and wherein the
7 database further includes a plurality of links to information;
8 (b) a code segment for identifying a particular service provider data structure
9 based on request data from a user;
10 (c) a code segment for identifying a particular link based on the request data;
11 (d) a code segment for sending the user the identified service provider data
12 structure and the identified link; and
13 (e) a code segment for allowing the user to obtain additional information
14 utilizing the identified link.
- 1 9. A computer program as recited in claim 8, wherein the service provider data
2 structures include data concerning contract service providers.
- 1 10. A computer program as recited in claim 9, wherein the service provider data
2 structures further include data concerning legal services.
- 1 11. A computer program as recited in claim 8, wherein the identified link is
2 capable of being utilized to obtain information concerning patent licensing.
- 1 12. A computer program as recited in claim 8, wherein the identified link is
2 capable of being utilized to obtain information concerning multi-country
3 licensing.

- 1 13. A computer program as recited in claim 8, wherein the database is accessed
2 utilizing a network.
- 1 14. A computer program as recited in claim 8, wherein the network is the
2 Internet.
- 1 15. A system for providing an information portal in a contract manufacturing
2 framework comprising:
3 (a) logic for providing a database including a plurality of service provider data
4 structures, wherein each service provider data structure includes a description
5 of a particular service provider, and wherein the database further includes a
6 plurality of links to information;
7 (b) logic for identifying a particular service provider data structure based on
8 request data from a user;
9 (c) logic for identifying a particular link based on the request data;
10 (d) logic for sending the user the identified service provider data structure and
11 the identified link; and
12 (e) logic for allowing the user to obtain additional information utilizing the
13 identified link.
- 1 16. A system as recited in claim 15, wherein the service provider data structures
2 include data concerning contract service providers.
- 1 17. A system as recited in claim 16, wherein the service provider data structures
2 further include data concerning legal services.
- 1 18. A system as recited in claim 15, wherein the identified link is capable of
2 being utilized to obtain information concerning patent licensing.
- 1 19. A system as recited in claim 15, wherein the identified link is capable of
2 being utilized to obtain information concerning multi-country licensing.

- 1 20. A system as recited in claim 15, wherein the database is accessed utilizing a
2 network.
- 1 21. A system as recited in claim 15, wherein the network is the Internet.
